

Choose through a selection of  
11 Eurowood Wood Grain textures or  
12 Eurowood solid textured colours!\*

\*See colour page for preselected solid colours. Personalised colour on special order.

## EZI-ALI SCREENING SYSTEM

## ALUMINIUM SCREENING NEVER LOOKED SO GOOD!

Simple and neat design, the Ezi-Ali 75mm aluminium blade slots into the TENSION-LOC slotted frame.

The 75mm blade provides a 2.4m span without the need for a support rail. This provides a clean and aesthetically pleasing screen.

### STYLE & QUALITY

- Super strength powder coated aluminium.
- Patented spring loaded frame holds slats without rivets, screws, nails or welding.
- Blades do not warp, crack or splinter.
- Low maintenance.
- Non-weld assembly for easy installation.
- Powder coated & finished in Australia.
- 7 years warranty

The colours shown in this catalogue are as close to the actual colours as the printing process allows and might vary from the actual Eurowood™ images or powder coated colour. MPG GROUP recommends using colour samples which are available upon request.

## STEP 2: SELECT YOUR BLADE SPACING

**There are 2 spacing options for your Ezi-Ali screen, fence or gate:**

- 9mm spacing provides extra privacy where required.
- 20mm spacing allows for better air flow and ventilation.

Once you have selected your slat spacing, refer to the Design Guide to confirm how many 75mm Ezi-Ali blades you will require for your screen height.

9mm SPACING		20mm SPACING	
Screen Height	Slats Required	Screen Height	Slats Required
848mm	10	969mm	10
932mm	11	1064mm	11
1016mm	12	1159mm	12
1100mm	13	1254mm	13
1184mm	14	1349mm	14
1268mm	15	1444mm	15
1352mm	16	1539mm	16
1436mm	17	1634mm	17
1520mm	18	1729mm	18
1604mm	19	1824mm	19
1688mm	20	1919mm	20
1772mm	21	2014mm	21
1856mm	22	2109mm	22
1940mm	23	2204mm	23
2024mm	24	2299mm	24
2108mm	25	2394mm	25
2192mm	26	2489mm	26
2276mm	27	2584mm	27
2360mm	28	2679mm	28

## STEP 3: SELECT YOUR BASIC INSTALLATION

1- Insert the blades (B) one at a time into the slotted frame (A1). Using a soft head mallet, tap the blades until they are fully engaged in the slotted frame.

2- Engage the blades with the second slotted frame (A2). Use the soft head mallet again, but this time tap the slotted frame (A2) until all blades are fully engaged.

3- Once your screen is complete, use either a U-channel, F-Section or a 25mm angle to attach your screen to posts, pillar or any other structure.
